Conflict Mineral Policy Statement

On August 22, 2012, the U.S. Securities and Exchange Commission (SEC) issued the final conflict minerals rule under Section 1502 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Conflict Minerals Rule”). The Conflict Minerals Rule requires publicly traded companies to report annually the presence of conflict minerals (tin, tungsten, tantalum and gold, or 3TG) originating in the Democratic Republic of Congo or adjoining countries.

It has been widely reported that the major driver of this violence is the natural abundance of minerals tin, tungsten, tantalum and gold, now referred to as conflict minerals. Armed groups fight for control of mines in this region and use forced labour to mine and sell the minerals, which in turn funds ongoing violence

As a socially responsible company, Kablageproduktion has concern for the well-being of people and communities. We conduct business fairly and ethically, respect human rights, comply with laws and regulations, and follow the Lagercrantz Group Code of Conduct.

Kablageproduktion is not subject to the SEC Conflict Minerals rule nor an US exchange traded company but have initiated a process that includes establishing compliance requirements only for the direct suppliers and/or material chosen by Kablageproduktion regarding conflict minerals, to implementing controls and reporting, undertaking appropriate sourcing efforts, and providing our customers the data necessary to facilitate their SEC reporting.
